

## Contact us

### Compact design

Makes it easier to install and operate the valve where space is limited.

### Universal release cylinder

The new release cylinder can be used with hydraulic, pneumatic or manual activation.

### Integrated fire release safety

The release cylinder has a built-in ring which melts in case of fire and closes the valve.

### Visual position indicator

Clear indication of the disk position in the valve. The valves can be equipped with micro switches indicating closed and/or opened position.

## Quick Closing Valves

# The Next Generation

## Quick Closing Valves

LK Valves AB has worked intensively to improve and redesign the Halla Hydro range and we are now proud to present the Next Generation Quick Closing Valves.

Having acquired the Swedish company Seffle Marine AB in 2003, LK Valves AB has become the specialist of Quick Closing Valves for marine applications.

Seffle Marine AB manufactured and supplied many thousands of the "Halla Hydro" Quick Closing Valves, which are installed on ships all over the world.

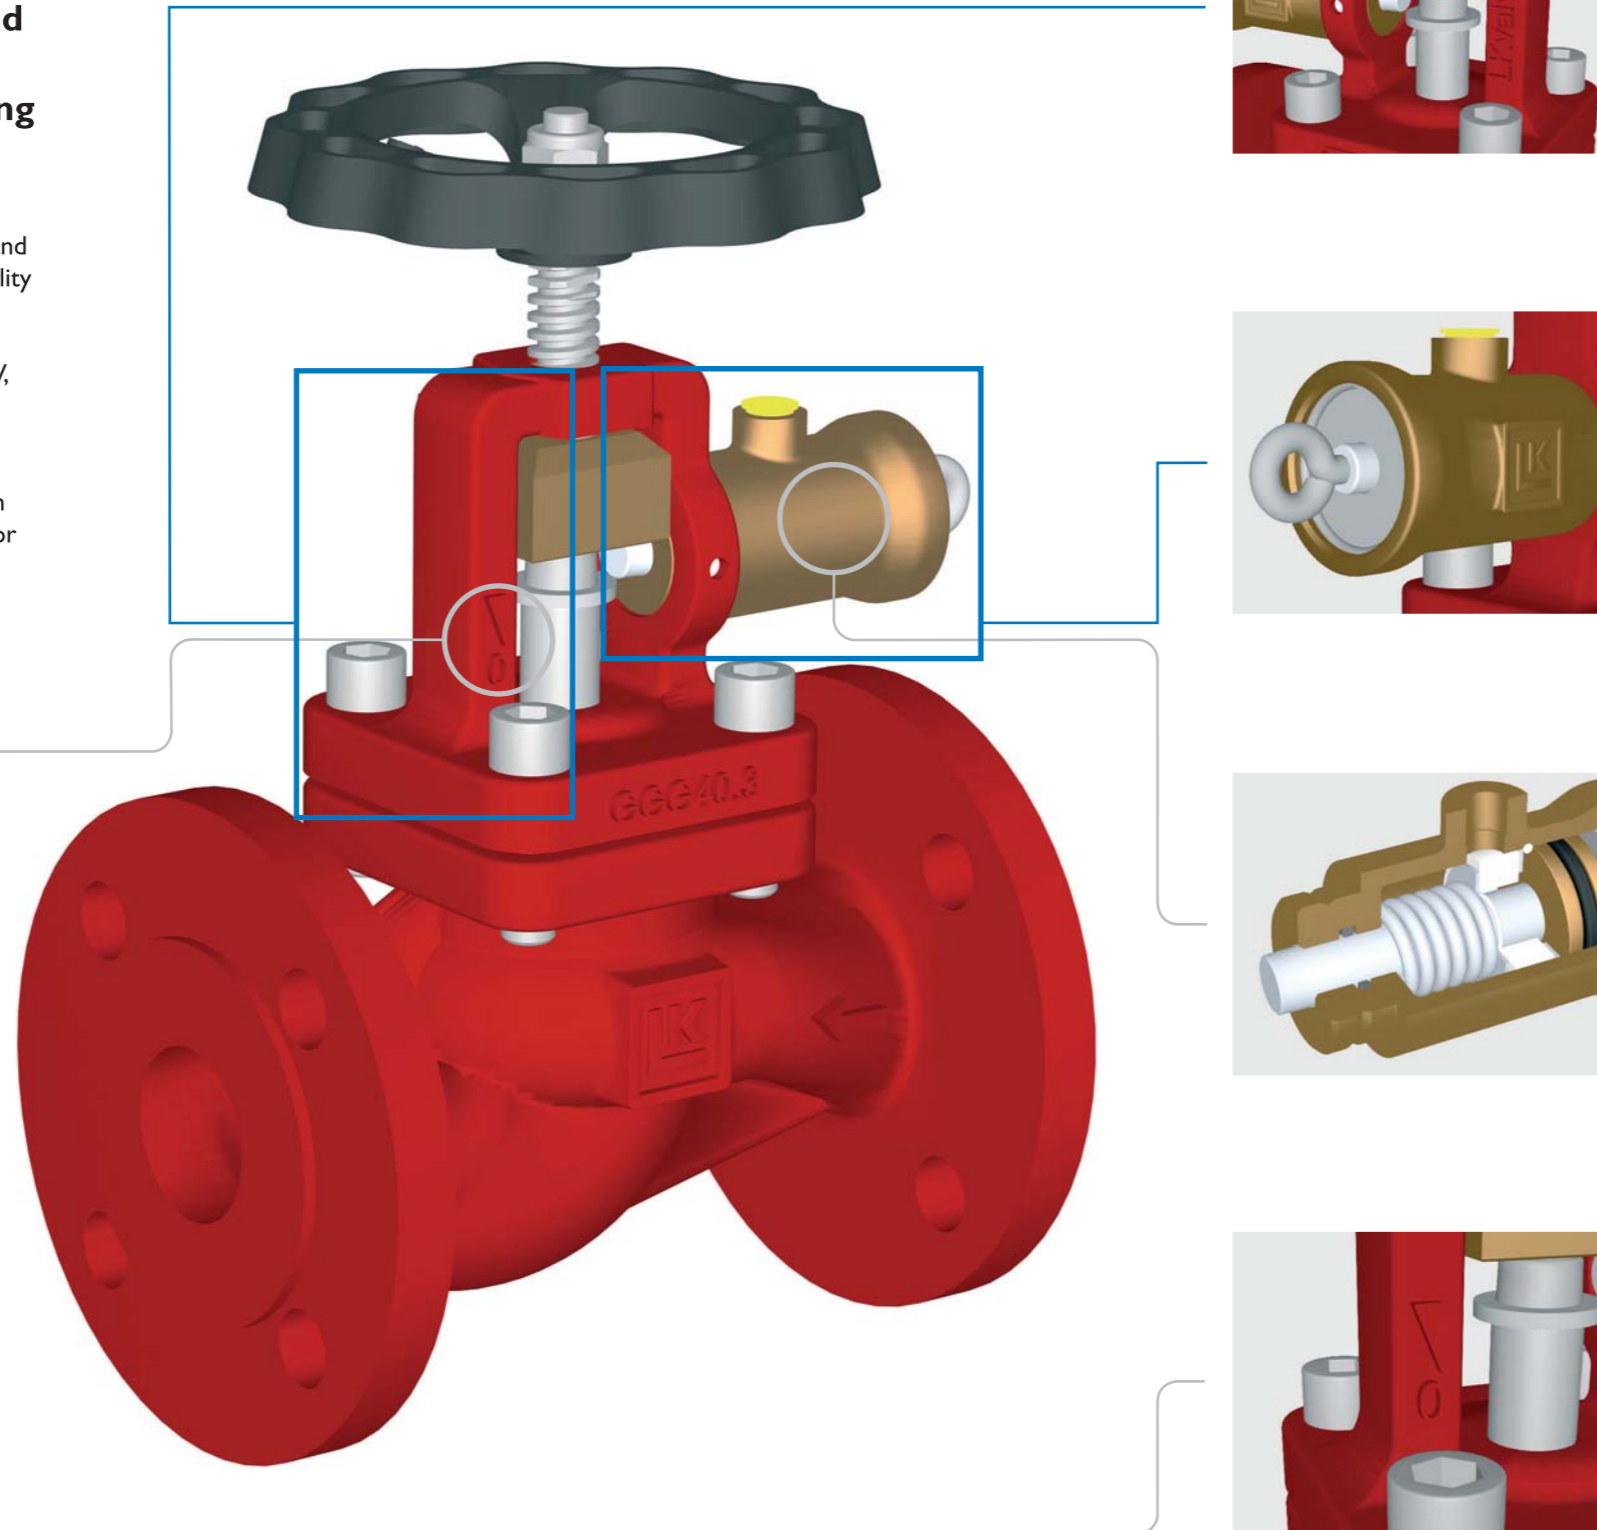

LK Valves AB has, since the acquisition of Seffle Marine AB, worked intensively to improve and redesign the Halla Hydro range and we are now proud to present the "Next Generation".

This new range of LK Quick Closing Valves combines state of the art features such as integrated automatic fire release, universal release cylinder for manual, hydraulic or pneumatic activation and ultra compact design with

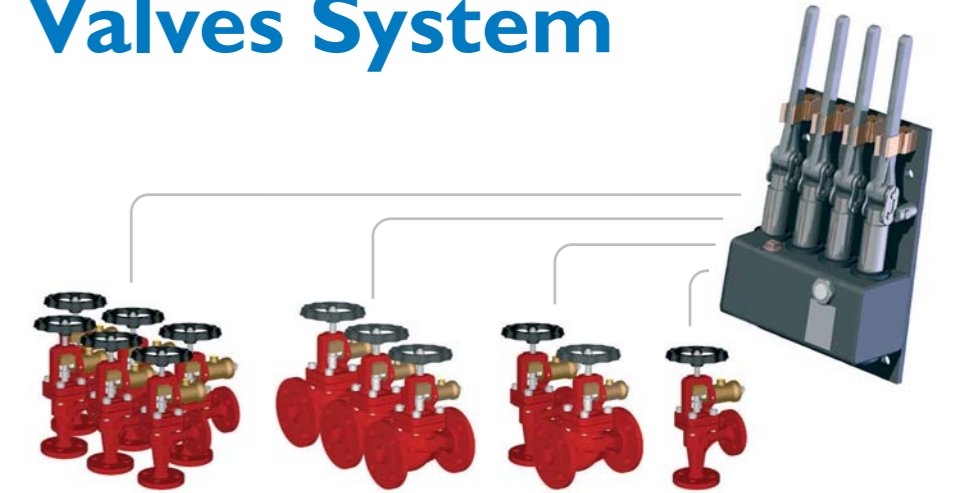

an excellent performance/cost ratio and the well known high Scandinavian quality of LK Valves AB.

The valves are type approved by DNV, Lloyds, Bureau Veritas, ABS and Germanischer Lloyd.

The new LK Quick Closing Valves can be activated either manually by wire or by the existing well proven complete system of hydraulic or pneumatic release stations of LK Valves AB.

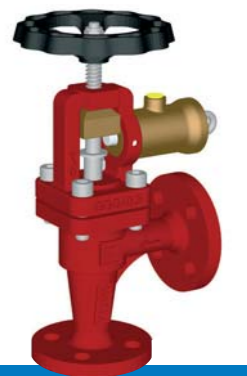

## The LK Quick Closing Valves System

The new range of LK Quick Closing Valves are fully compatible with the existing and well proven range of LK hydraulic or pneumatic Release Stations and Control Cabinets.

**LK Quick Closing Valve Straight type**  
GGG 40.3/AISI 304

**LK Quick Closing Valve Angle type**  
GGG 40.3/AISI 304

**LK Hydraulic Release Station Type GC with 1 to 6 handles**

In cabinet with breakable glass and hammer.

**LK Pneumatic Release Station type PCS**

In cabinet with breakable glass and hammer.

## Type Approvals

LK Quick Closing Valves are type approved by the following classification societies:
